

Cheatsheet Routing & Middleware

1. CodeIgniter 4 (PHP)

Routing:

```
$routes->get('dashboard', 'AdminController::index');
```

Middleware:

```
$routes->get('dashboard', 'AdminController::index', ['filter' => 'auth']);
```

2. Laravel (PHP)

Routing:

```
Route::get('/dashboard', [AdminController::class, 'index']);
```

Middleware:

```
Route::get('/dashboard', [AdminController::class, 'index'])->middleware('auth');
```

3. ExpressJS (Node.js)

Routing:

```
app.get('/dashboard', adminController.index);
```

Middleware:

```
app.get('/dashboard', authMiddleware, adminController.index);
```

4. FastAPI (Python)

Routing:

```
@app.get('/dashboard')
async def read_dashboard():
    return {'message': 'Welcome'}
```

Middleware:

```
from fastapi import Depends
@app.get('/dashboard', dependencies=[Depends(verify_token)])
async def read_dashboard():
    return {'message': 'Welcome'}
```

5. Fiber (Go)

Routing:

```
app.Get('/dashboard', adminController.Index)
```

Middleware:

```
app.Get('/dashboard', authMiddleware, adminController.Index)
```
